

SMART ELECTRICITY SUPPLY WEEK

11-15
MAR
2019
SINGAPORE

Pre-conference Masterclass		Design, Control & Modelling of Microgrid	
Date	11-12 Mar 2019	Course Fee	S\$2,200 per pax
Conference & Exhibition		Smart Technologies for Electricity Supply	
Date	13-14 Mar 2019	Conference Fee	S\$800 per pax
Post-conference Masterclass		Design, Operation & Maintenance of Underground Substation	
Date	15 Mar 2019	Course Fee	S\$1,100 per pax

➤ Group discounts available for overseas participants!
Contact us to find out more!

➤ Pending funding grant for Singapore Citizens & PRs!
*All stated course fees exclude 7% GST

Organised by
Singapore Institute of
Power and Gas

SAVE THE DATES

➤ PROGRAMME FOR THE WEEK

Date	Programme
11-12 Mar 2019	Masterclass: Design, Control & Modelling of Microgrid In-depth discussions on the design of microgrids, starting with feasibility study and business case development through concept design, detailed engineering design, procurement, installation, testing and commissioning.
13-14 Mar 2019	Conference: Smart Technologies for Electricity Supply Thought leaders and practitioners sharing perspectives and knowledge on advances in next generation technologies and integration of smart technologies in electricity supply systems. Includes optional half-day technical site visits.
15 Mar 2019	Masterclass: Design, Operation & Maintenance of Underground Substation Learn all about the engineering behind an underground electrical substation that overcomes space constraints, while maintaining reliability and safety.
